DIAGNOSIS UPDATE

WOW! LOOQIT 5.37.00

As with every update, the focus of development is on new and "middle-aged" models. The oldest revised systems date from 1985!

Age	Update share
0 - 3	15 %
4 - 10	41 %
11 and older	44 %

DIAGNOSIS UPDATE

WOW! LOOQIT 5.37.00

The sales figures of hybrid and high-voltage vehicles are also reflected in our development efforts. The systems with the greatest growth are again:

Electric vehicles with 21,6 %

ADAS calibration with 16,7 %

DIAGNOSIS UPDATE

WOW! LOOQIT 5.37.00

Welcome Tesla!

It is always nice to add new vehicle brands in the vehicle database. But this time it is a little bit extra nice. In the upcoming diagnosis release you will find Tesla. By adding **Tesla**, the database becomes close to complete when it comes to counting electric vehicle brands.

Initially, Model S and Model X are the models that are added. The coverage of what you can do is of course not complete, but surprisingly good considering it being a brand-new make. From the most basic diagnostics such as reading and erasing fault codes on a vast number of systems and of course reset service light, to more advanced adjustments, activations and more.

Tesla is probably the most known electric vehicle manufacturer in the world and has been a big accelerator in questioning and challenging the fossil fuel era. Adding Tesla is not only important for the workshops using our diagnostic solutions. It also goes hand in hand with our company vision of leading the journey to 100% safe and sustainable vehicles on our roads.

A big welcome to Tesla!
